

GO GREEN AND SAVE GREEN WITH WINDOW FILM

A home improvement idea that can help save money and save the environment.

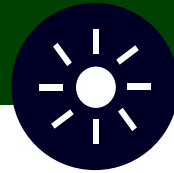

Before you replace those older windows outright, the International Window Film Association ([IWFA](#)) has a number of ways you can save money while being environmentally conscious with professionally installed window film.

Increase energy efficiency at a lower cost than most replacement windows

Potential eligibility for "Go Green" energy rebates

Protection from 99% of UV rays, reducing damage to skin and eyes

Add a layer of protection to the glass, especially during storms

Reduce fading of furniture and furnishings inside your house

Reduce your carbon footprint

Save on heating and cooling costs
